

Over 70 Years of Experience and Thousands of Homes Built in Florida.

Calea Township is another fine “Colen Built” community, brought to you by the same successful developer of On Top of the World Communities. Founded in St. Petersburg, Florida in 1947 by the late Sidney Colen, our award winning, family-owned building and development company has built many thousands of homes in Florida for people of all ages. In 1975, Colen brought his experience and vision to Ocala with the purchase of Circle Square Ranch, a 13,000 acre working cattle ranch.

The passion for creativity in land development and home building flows in the Colen blood. Kenneth Colen, Sidney’s son, grew up in the business and since 1981, has served as President and Developer of all homebuilding operations. As a debt-free company we have the financial stability, and decades of family owned expertise, to deliver on our promise to build quality, energy-efficient homes in well-designed, amenity rich communities for years to come. Our management team has worked together for many years and we remain the oldest, privately owned land developer in the state of Florida.

Today, the “Colen Built” legacy of building quality homes in exceptional communities that customers are proud to own lives on in every home we deliver. Just like it did when we started back in 1947.
